

On arrival in Sri Lanka

The airport will have high intensity sanitation measures in place for all areas and staff.

- There is no quarantine on arrival unless symptoms are detected.
- A PCR test would be done on arrival at the airport. No charge.
- Currently it takes 24 hours to receive the test results. We are making changes to have results within 4-6 hours by August. In the event it is required to wait 24 hours for test results; you will be able to select a hotel for a one-night stay from Certified 4 or 5-star hotels in Colombo or Negombo until the test results are received.
- A further test will be done 4-5 days after arrival by a mobile unit in coordination with your Certified Accommodation provider.
- Travelers staying for more than 10 days will be required to take a third test during their stay. While this may be inconvenient it is essential to safeguard everybody and provide peace of mind.
- In case of a positive PCR result, quarantine in a designated hotel or hospitalisation will take place depending on the details of the case. Quarantine would usually be 14 to 21 days if symptoms are detected.

Moving around Sri Lanka

- To ensure your safety, please arrange transportation prior to your arrival, with your Certified Accommodation provider or travel agent. Public transport should not be used.
- All tourist sites will be open from the 1st August onwards with safety protocols and measures in place to ensure the wellbeing of our travelers.
- There will be no travel restrictions between districts for tourists.

What is Sri Lanka's status with COVID-19?

Being an island, and thanks to the proactive measures taken, Sri Lanka has been able to manage the spread of the virus. No active community clusters have been detected in the last 30 days within the country.
